

Fact Sheet: Planned Parenthood's 2019-20 Annual Report¹

Planned Parenthood's Financials

- In its 2019-20 annual report, Planned Parenthood reported **\$1.6 billion in income² and over \$2.0 billion in net assets³ -- an increase from the previous report.**
 - \$510 million came from private contributions, **down 14%** from the previous report.⁴
 - Taxpayer funding in the form of government grants, contracts, and Medicaid reimbursements hit **\$618.1 million, or almost \$1.7 million per day⁵**— an annual increase of \$1.3 million from the previous year to make up **38% of Planned Parenthood's overall revenue.**⁶
 - Planned Parenthood's taxpayer funding has **increased by nearly 27% since 2010.**⁷
 - However, taxpayer funding is reported by Planned Parenthood's affiliates, whose information lags behind the national office and covers fiscal years ending in 2019.⁸ In mid-2019, Planned Parenthood chose to leave the taxpayer-funded Title X program rather than stop performing abortions,⁹ so **taxpayer funding may be lower in next year's report.**
 - Planned Parenthood's **excess of total revenue over total expenses is \$69.7 million.**¹⁰ Last year Planned Parenthood reported **an excess of total revenue over total expenses of \$110.5 million.**¹¹

Abortions and Non-abortion Services: Change from Last Year and Long-term Trends

- Planned Parenthood's service data lags behind the rest of the information in the report – the 2019-20 report contains information on services provided in 2018-2019.
- Planned Parenthood **performed 354,871 abortions¹²** in 2018-19 – an increase of nearly 9,200 from the previous year – and **over 3.3 million abortions¹³** over the past 10 reports.
- The number of patients (2.4 million)¹⁴ remained constant from the previous report, while the number of abortions increased.
- In 2018-19, **abortions made up 96.4% of Planned Parenthood's pregnancy resolution services,** while prenatal services, miscarriage care, and adoption referrals accounted for only 2.3% (8,626), 0.6% (2,110) and 0.7% (2,667), respectively.¹⁵

¹⁵ Planned Parenthood 2019-20 Annual Report, p. 35.

- **For every adoption referral in 2018-19, Planned Parenthood performed 133 abortions.**¹⁶ Over the past 10 annual reports, the ratio was approximately 129 abortions for every adoption referral.¹⁷
- According to data from Planned Parenthood's own annual reports¹⁸, since 2010:
 - Total services are **down 5.7%**.
 - With changing practice guidelines,¹⁹ total cancer screening and prevention services have **dropped by 63%**, including declines of **64% for breast exams** and almost **65% for pap tests**.
 - Prenatal services are **down 79% from their peak in 2009**.
 - Contraceptive services are **down 30%**.
 - Unique patients have **dropped by 600,000 – a 20% decline**.
