Finding Hope in Florida

When August found out she was pregnant, she recalls, "I was very scared and knew that I did not want a baby at that time. I was afraid of what my parents would say since I was in nursing school. Having a baby seemed impossible." She believed the only way out of her situation was to take the abortion pill. That afternoon, she took the first pill at the Planned Parenthood abortion center and went home with her bag of pills to take the next day.

However, when she got home, she immediately began having doubts. Not knowing what to do, she called her mom. Her mom got on the internet and found Abortion Pill Rescue Network (APRN). Within minutes, August was talking with the APRN nurse and they set up an appointment with the local abortion pill reversal provider at Mosaic Sexual Health Clinic, part of A Women's Pregnancy Center.

August was soon at Mosaic receiving her ultrasound. "The moment I first saw my baby on the ultrasound, my life was complete. I was nervous about being a mom, but I knew I could do it." The staff at Mosaic cared deeply for August and answered all her questions. They gave her the first dose of progesterone and connected her to an obstetrician. They continued to follow up with August through her pregnancy and seven months later, Carter Jay came into the world. "He is the smartest, most active little boy ever and I love him so much. God used Mosaic to save my baby and I am forever grateful. I graduate in May 2024 and my son and I are doing great!"

August with her son, Carter Jay

NOTES:

- This report is a collaborative project between Charlotte Lozier Institute (CLI) and Care Net. We are grateful to Heartbeat International and the National Institute of Family and Life Advocates for their contributions towards data collection from their affiliated U.S. pregnancy centers.
- Value of services is based upon materials and services provided by 159 pregnancy centers in the state of Florida in calendar year 2022. At least 40 of these centers reported having received state or federal funding in 2022.
- Total savings are calculated based on cost estimates of services, classes and baby items provided to clients. The sources for the cost estimates and valuation of items and services can be found in the Methodology section, pgs. 15-16, of the 2022 CLI national pregnancy center report, "Hope for A New Generation" (<https://lozierinstitute.org/pcr/>), except for the following state-specific labor costs.
- The Florida mean hourly wages referenced are as follows: Social Workers in local/state government is \$28.55 per hour - BLS OES code 21-1029, Registered Nurses is \$40.75 per hour - OES code 29-1141, and Diagnostic Medical Sonographers is \$37.40 per hour - OES code 29-2032.
- The estimated savings does not include housing and other monetary assistance provided to some clients. We advocate for our clients by networking with hundreds of county, state and non-profit social service organizations around the country. We cannot quantify the value of emotional support given to the women we help through phone calls and caring volunteers.
- Published June 2024.
