## MADE POSSIBLE BY

**155 total paid staff, 19% of whom were licensed medical professionals**

**563 total volunteers, 16% of whom were licensed medical professionals**

### Finding Hope in Arizona

Glenda shares her story about receiving care and services at a pregnancy center in Arizona. "I was in a hard situation. I went to a clinic that I had been to before and I knew that I could trust them. I went in for the pregnancy test, but I already knew the test would be positive. I was offered an ultrasound right away. When I saw her, I fell in love so fast. I also heard her heartbeat!"

Alejandro, Glenda and their daughter Jailyne.

"I knew her father would want me to have an abortion, so I decided not to tell him that I was pregnant until I was 15 weeks and then I took him into the clinic to see the baby. He was not so convinced." The pregnancy medical center shared medically accurate information with him about his developing baby and about abortion. Glenda shares, "He did not believe what they were saying about abortion, but he went home and Googled abortion, and then he also knew we could not get an abortion. He became protective of both me and the baby."

The professional medical care and ongoing material services Glenda received at the pregnancy center provided her with essential support during and after her pregnancy. Glenda went on to have a beautiful baby girl, Jailyne. She is thankful, saying, "The clinic has helped me in many ways, but the important service that I received was the ultrasound where I saw my baby for the first time."

As she reflects on her time with the pregnancy center, she shares, "I am not alone. I have grown stronger in faith and have support. Thank you to all who keep the pro-life message alive and offer health care to women who are faced with difficult circumstances."

#### NOTES:

- This report is a collaborative project between Charlotte Lozier Institute (CLI) and Care Net. We are grateful to Heartbeat International and the National Institute of Family and Life Advocates for their contributions towards data collection from their affiliated U.S. pregnancy centers.
- Value of services is based upon materials and services provided by 44 pregnancy centers in the state of Arizona in calendar year 2022. None of the centers reporting data received state or federal funding in 2022.
- Total savings are calculated based on cost estimates of services, classes and baby items provided to clients. The sources for the cost estimates and valuation of items and services can be found in the Methodology section, pgs. 15-16, of the 2022 CLI national pregnancy center report, "Hope for A New Generation" (<https://lozierinstitute.org/pcr/>), except for the following state-specific labor costs.
- The Arizona mean hourly wages referenced are as follows: Social Workers in local/state government is \$32.01 per hour - BLS OES code 21-1029, Registered Nurses is \$43.96 per hour - OES code 29-1141, and Diagnostic Medical Sonographers is \$45.51 per hour - OES code 29-2032.
- The estimated savings does not include housing and other monetary assistance provided to some clients. We advocate for our clients by networking with hundreds of county, state and non-profit social service organizations around the country. We cannot quantify the value of emotional support given to the women we help through phone calls and caring volunteers.
